Summary

Computer Science student and Software Developer Intern at Antbox, building full-stack web applications with React, Next.js, Node.js, and PostgreSQL. Exposure to Python ML pipelines, geospatial analysis, and REST API design. Team-focused and driven to solve complex, real-world problems through scalable architecture.

Education

Kalinga Institute of Industrial Technology

Expected May 2027

Bachelor of Technology in Computer Science and Engineering (GPA: 9.34 / 10.00)

Bhubaneswar, Odisha

- **Relevant Coursework:** Data Structures and Algorithms (C), Object Oriented Programming (Java), Operating Systems, Database Management System, Computer Networks, Distributed Operating Systems, Data Mining & Data Warehousing, Machine Learning, Artificial Intelligence, Cloud Computing, Automata & Formal Languages

Experience

Antbox

January 2026 – Present

Software Developer Intern

Remote

- Redesigned homepage, products page, and resources/blog section of a client-facing Next.js web platform, contributing to responsive UI architecture and component design.
- Contributed to ML demand forecasting pipeline in Python/Scikit-Learn, forecasting next-day food order volumes and item-level details from historical restaurant data.
- Executed geospatial analysis across 20+ locations for optimal restaurant site selection, integrating US Census, LODES, Google Maps/Places, and ArcGIS APIs with GeoPandas.
- Built event-driven GCP backend: Pub/Sub-triggered email-notification webhooks, BigQuery with query optimization for analytics over 4 years of multi-source data, services deployed on Cloud Run.

KIITFest 8.0 Website

December 2024 – February 2025

Frontend Developer

Bhubaneswar, Odisha

- Live: kiitfest.org
- Engineered UI for fest site with 17K+ registrations, using responsive, accessible design.
- Optimized the website, ensuring seamless experience during peak traffic of 2,000+ concurrent users.
- Integrated custom QR auth system with APIs, cutting distribution time 40% for 17K+ users.

IoT Lab, KIIT

August 2024 – Present

Frontend Developer

Bhubaneswar, Odisha

- Architected events platform with React/TypeScript, adding scheduling and API integrations for 6K+ users.
- Enhanced Innovance 3.0 website (Next.js/TypeScript), achieving 150% traffic growth through responsive UI components (Live: innovance.iotkiit.in).

Projects

Multi-Document Intelligence System | Python, PyMuPDF, Sentence Transformers, RAG

Adobe Hackathon 2025

- Led team of 3 to build a RAG pipeline extracting text and structural metadata (title, headings, subheadings, body, captions) from PDFs using PyMuPDF for semantically-aware chunking.
- Implemented persona-conditioned multi-document retrieval, queries phrased as specific personas surface curated, role-relevant sections across documents via sentence-transformer embeddings.

Solace - AI Mental Healthcare Platform | React.js, AI Integration, OpenStreetMap

Live: [Solace](#) · Code: [GitHub](#)

- Led team of 3 to ship AI-powered counseling platform serving users facing mental health distress, with Pino-based activity logging built around user privacy (2nd Runners Up, ICDCIT Hackathon 2.0).
- Developed hospital finder with OpenStreetMap, surfacing healthcare facilities within a 5km radius to reduce time-to-help for users in critical situations.

Share-Fare@KIIT - Campus Ride Sharing Platform | Next.js, PostgreSQL

Live: [Share-Fare](#) · Code: [GitHub](#)

- Architected full-stack ride sharing platform with Next.js and PostgreSQL backend for verified peer-to-peer ride sharing among KIIT students.
- Designed REST API endpoints and relational schema for ride listing, request handling, and matching workflow.

SectionFinder - Section Swapping Platform | Node.js, Express.js, PostgreSQL

Live: [SectionFinder](#) · Code: [GitHub](#)

- Built Node.js/Express.js backend with JWT-based authentication and KIIT email verification, exposing REST APIs for user, session, and swap-request management.
- Implemented real-time matching algorithm connecting students with compatible section swap requests.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C, C++, SQL, HTML, CSS

Frameworks/Libraries: Next.js, React.js, Node.js, Express.js, Tailwind CSS, Scikit-Learn, Pandas, GeoPandas, Sentence Transformers, PyMuPDF

Cloud, Databases & Tools: GCP (Cloud Run, GCS, Pub/Sub, BigQuery), PostgreSQL, MySQL, Git, GitHub, Postman, Vercel

Concepts: Full-Stack Development, REST API Design, RAG, Vector Search, Machine Learning, DSA, Agile
